

New Mitigation Options From Ecosystem Renewal!

CENLA MITIGATION BANK

Ecosystem Renewal is excited to announce its newest wetland mitigation project— *THE CENLA MITIGATION BANK*. This 446 acre restoration project located in Rapides Parish will provide bottomland hardwood credits in the Bayou Teche (08080102), Vermillion (08080103) and Atchafalaya (08080101) watersheds. High credit-value restoration credits will be created by the restoration of this rice farm back to a bottomland hardwood forested ecosystem.

JANUARY 2010

The Haynesville Shale Exploration Area

SHREVEPORT MITIGATION BANK

Ecosystem Renewal's *SHREVEPORT MITIGATION BANK* will have bottomland hardwood credits available in the 2nd quarter of 2010. Located in south Bossier Parish, this 290 acre bank will provide high-value restoration credits for projects located in the Red River (111402) watershed. The *SHREVEPORT MITIGATION BANK* service area includes the very active Cotton Valley and Haynesville Shale petroleum exploration areas. Demand is high for wetland mitigation credits in this area.
